NOTES TO FINANCIAL INFORMATION

1. BASIS OF PREPARATION

The annual results set out in the announcement do not constitute the Group's financial statements for the year ended 31 December 2010 but are extracted from those financial statements.

The financial statements have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRSs"), which collective term includes all applicable individual Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), accounting principles generally accepted in Hong Kong and the disclosure requirements of the Hong Kong Companies Ordinance. The financial statements also comply with the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited ("the Stock Exchange").

2. CHANGES IN ACCOUNTING POLICIES

The HKICPA has issued two revised HKFRSs, a number of amendments to HKFRSs and two new interpretations that are first effective for the current accounting period of the Group. Of these, the following developments are relevant to the Group's financial statements:

- HKFRS 3 (revised 2008), *Business Combinations*
- Amendments to HKAS 27, *Consolidated and Separate Financial Statements*
- Improvements to HKFRSs (2009)
- HK(Int) 5, *Presentation of financial statements – Classification by the Borrower of a Term Loan that contains a Repayment on Demand Clause*

The Group has not applied any new standard or interpretation that is not yet effective for the current accounting period.

The issuance of HK(Int) 5 has had no material impact on the Group's financial statements as the Interpretation's conclusions were consistent with the accounting policies already adopted by the Group. The other developments resulted in changes in accounting policies but none of these changes in policy has had a material impact on the current or comparative periods, for the following reasons:

- The impact of the majority of the revisions to HKFRS 3 and HKAS 27 has not yet had a material effect on the Group's financial statements as these changes will first be effective as and when the Group enters into a relevant transaction (for example, a business combination, a disposal of a subsidiary or a non-cash distribution) and there is no requirement to restate the amounts recorded in respect of previous such transactions.
- The impact of the amendments to HKFRS 3 (in respect of recognition of acquiree's deferred tax

- As a result of the amendments to HKAS 17, *Leases*, arising from the “Improvements to HKFRSs (2009)” omnibus standard, the Group has re-evaluated the classification of its interests in leasehold land as to whether, in the Group’s judgement, the lease transfers significantly all the risks and rewards of ownership of the land such that the Group is in a position economically similar to that of a purchaser. The Group has concluded that the classification of such leases as operating leases continues to be appropriate.

3. **TURNOVER**

The principal activities of the Group are the manufacturing of, trading of and provision of processing services for polysilicon and monocrystalline and multicrystalline silicon solar ingots/wafers and the producing of and trading of photovoltaic modules as well as the installation of photovoltaic systems.

Turnover represents the sales value of goods supplied to customers less value added tax and trade discounts and income from the provision of processing services and the installation of photovoltaic systems. The amount of each significant category of revenue recognised in turnover during the year is as follows:

2010	2009
-------------	------

6. PROFIT/(LOSS) BEFORE TAXATION

Profit/(loss) before taxation is arrived at after charging/(crediting):

For the year ended 31 December 2009, no provision for Hong Kong Profits Tax was made as subsidiaries of the Group either did not have any assessable profits subject to Hong Kong Profits Tax or had accumulated tax losses brought forward from previous years to offset the estimated assessable profits for the year.

For the year ended 31 December 2010, no provision for Hong Kong Profits Tax has been made as subsidiaries of the Group did not have any assessable profits subject to Hong Kong Profits tax or sustained losses for Hong Kong taxation purposes.

Pursuant to the applicable laws of the Cayman Islands, the Group is not subject to any income tax in the Cayman Islands.

The PRC subsidiaries of the Group were subject to the following PRC Corporate Income Tax (“CIT”) rates for both years ended 31 December 2009 and 2010:

	2010 <i>RMB'000</i>	2009 <i>RMB'000</i>
Shanghai Jingji Electronic Materials Co., Ltd.	25%	25%
Jinzhou Jingji Solar Technology Co., Ltd.	25%	25%
Jinzhou Rixin Silicon Materials Co., Ltd.	25%	25%
Jinzhou Youhua Silicon Materials Co., Ltd.	25%	25%
Jinzhou Yangguang Energy Co., Ltd (“Yangguang”) (<i>note</i>)	15%	15%
Jinzhou Jinmao Photovoltaic Technology Company Limited	25%	25%
Solargiga Energy (Qinghai) Co., Ltd.	25%	N/A

Note: In 2009, Yangguang was granted the status of a “High and New Technology Enterprise” that entitled it to a preferential CIT rate of 15% for three years commencing from the year ended 31 December 2009.

Under the CIT Law of the PRC and its relevant regulations, dividends receivable by non-PRC corporate residents from PRC enterprises are subject to withholding tax at a rate of 10% or 5% for earnings accumulated beginning on 1 January 2008. Accordingly, a provision for withholding tax in respect of the undistributed profits from the PRC subsidiaries has been made for both years ended 31 December 2010 and 2009.

8. DIVIDENDS

(a) Dividends payable to equity shareholders of the Company attributable to the year

	2010 RMB'000	2009 RMB'000

9. EARNINGS/(LOSS) PER SHARE

(a) Basic earnings/(loss) per share

The calculation of basic earnings/(loss) per share is based on the profit attributable to the ordinary equity shareholders of the Company of RMB214,121,000 (2009: loss of RMB98,098,000) and the weighted average of 1,807,170,425 (2009: 1,705,687,406) ordinary shares of the Company in issue during the year as calculated as set out in note 9(b).

(b) Weighted average number of ordinary shares

	Number of ordinary shares 2010	2009
Issued ordinary shares at 1 January	1,807,170,425	1,690,766,500
Effect of shares issued in lieu of cash dividend	–	2,447,276
Effect of shares issued under the listing of Taiwan Depository Receipts	–	5,753,425
Effect of shares issued under the share option scheme	<u>–</u>	<u>6,720,205</u>
Weighted average number of ordinary shares	<u>1,807,170,425</u>	<u>1,705,687,406</u>

(c) Diluted earnings/(loss) per share

There were no dilutive potential ordinary shares in issue during the years ended 31 December 2009 and 2010.

10. SEGMENT REPORTING

In prior periods, the Group managed the operations of the manufacturing of, trading of and provision of processing services for polysilicon and monocrystalline and multicrystalline silicon solar ingots/wafers/modules as a whole. The composition of the operating segments was changed in the current year as a result of the significant growth of the manufacturing of and trading of photovoltaic modules and installation of photovoltaic systems business. The change in the composition of the operating segments has resulted in the change in the internal reporting information reviewed by the Group's most senior executive management.

In a manner consistent with the way in which information is reported internally to the Group's most senior executive management for the purposes of resource allocation and performance assessment, the Group has identified two reportable segments in 2010: (i) the manufacturing of, trading of and provision of processing services for polysilicon and monocrystalline and multicrystalline silicon solar ingots/wafers ("Segment A"); and (ii) the manufacturing of and trading of photovoltaic modules and installation of photovoltaic systems ("Segment B"). No operating segments have been aggregated to form these reportable segments. Comparative figures have been restated to reflect such change.

(a) Segment results, assets and liabilities

For the purpose of assessing segment performance and allocating resources between segments, the Group's senior executive management monitors the results, assets and liabilities attributable to the reportable segments which are presented in the same way in the Group's financial statements. Information regarding the Group's reportable segments are disclosed as follows:

	Segment A		Segment B		Total	
	2010	2009	2010	2009	2010	2009
	<i>RMB'000</i>	<i>RMB'000</i>	<i>RMB'000</i>	<i>RMB'000</i>	<i>RMB'000</i>	<i>RMB'000</i>

Inter-segment revenue	–	–	–	4,540	–	4,540

(b) Geographic information

The following table sets out information about the geographical location of the Group's revenue from external customers. The geographical location of customers is based on the location at which the services were provided or the goods delivered. The Group's property, plant and equipment, lease prepayments and interest in an associate are physically located or operated in the PRC.

13. NON-ADJUSTING EVENTS AFTER THE REPORTING DATE

- (a) On 26 January 2011, the Group acquired a 100% equity interest in Sino Light Investment Limited (“Sino Light”) at a consideration of HK\$835,200,000, which was settled in full by the issue of convertible bonds of the Company. The convertible bonds, which are zero-coupon bonds can be converted into 435,000,000 ordinary shares of the Company. The conversion period commences on 28 March 2011 and ends on 25 January 2013.

Sino Light and its subsidiaries (the “Sino Light Group”) are engaged in the manufacturing and trading of monocrystalline silicon solar cells. The Group has now engaged an independent professional qualified valuer to identify and measure the assets acquired and the liabilities assumed and such exercise has not been completed. Accordingly, the fair value of interest in the Sino Light Group, the amount of goodwill and intangible assets, if any, arising from this business combination are not yet available. Based on the information obtained so far, the Sino Light Group had the following classes of assets acquired and liabilities assumed at the acquisition date; cash and bank deposits, trade and other receivables, bank borrowings, trade and other payables with an estimated value of RMB33,669,000, RMB91,311,000, RMB190,000,000 and RMB153,658,000, respectively.

- (b) On 24 March 2011, the Group has entered into a long-term contract with a supplier for the purchase of polysilicon. Pursuant to the contract, the Group is required to make a cash deposit to the supplier totalling approximately US\$34,500,000 (equivalent to approximately RMB228,107,000) as a prepayment for future product deliveries and the deposit must be paid in full on or before 11 March 2013.

MANAGEMENT DISCUSSION AND ANALYSIS

Market Overview

As countries around the world gradually overcome the economic shocks brought by the financial crisis, the global solar energy industry gradually recovered, while market demand has also rebounded. In 2010, saving energy and emissions reduction as well as the development of clean energy have become crucial topics among governments of different countries. As various countries continue to encourage the development of the solar energy industry through different

of solar energy power generation in 2010 reached 400M , making the aggregate installed capacity to 700M . In order to facilitate the PRC government's decision to further develop renewable energy industry, the National Energy Administration has organised large-scale open tender for 13 solar energy power generation stations located in the Northwest China and Inner Mongolia in August 2010 with provision of subsidies. The total installed capacity of these projects amounts to 280M . The National Development and Reform Commission has also approved two solar energy photovoltaic power generation projects located in Ningxia and uhan respectively in December 2010 as Clean Development Mechanism projects. In addition, at the beginning of this year, the Ministry of Finance of the PRC has apportioned RMB50 billion to fund energy conservation and greenhouse gas emissions reduction to support and encourage the development of the solar energy industry. According to China Renewable Energy Society Solar PV Committee (中國可再生能源學會光伏專業委員會), the solar energy power generation of the PRC is expected to have increased by at least 500M in 2010. ith subsidies provided by various local governments, it is expected that the demand for solar energy in Mainland China would continue to increase throughout 2010. Furthermore, market expects the PRC government will use the same method as promoting wind power generation industry in the past, and will initiate more similar large-scale projects for tender, laying a solid foundation for nationwide price-setting for solar energy power generation in the future.

Operation Review

Market rebounds and production capacity continues to expand

During the year under review, the PRC's economy witnessed a positive growth momentum, raw material prices tended to be stable and the operating environment continued to improve, all of which are favorable to the long-term development of the solar energy industry. As the market recovered, there has been excess demand in various solar energy products. Faced with the ever-expanding demand, the Group has actively expanded its production capacity during the year. By making use of its advantages, the Group further expanded its production scale to accommodate the huge amount of product shipments. As at 31 December 2010, the Group was equipped with 397 monocrystalline ingot pullers, 83 wiresaws and 4 multicrystalline casting furnaces, while our production capacity of ingots, wafers and solar energy photovoltaic module components have increased significantly, reaching 800M , 600M and 50M respectively.

ith thriving market demand for solar energy products, the number of orders for our products increased accordingly. During the year under review, the Group has grasped the opportunities and endeavoured to maintain the relationship with its long-term customers, whilst successively entering into long-term sales contracts with a number of customers, including renowned enterprises from Japan and the US. As such, the Group's market share in the industry has been further consolidated, thereby establishing its leading position. The shipment volumes for our self-manufactured silicon solar ingots and wafers kept growing during the year under review, reaching approximately 76.99M (2009: 7.00M) and 225.27M (2009: 93.91M) respectively. The volume of processing silicon solar ingots and wafers was approximately 25.94M (2009: 10.60M) and 6.46M (2009: 2.09M) respectively.

Successfully expanded laterally while vertical integration taking shape

The Group strives to become the leading enterprise in the global solar energy industry. Therefore, the Group has undergone various acquisitions and investments during the year under review, so as to actively expand its business in accordance with its target of balanced lateral expansion and vertical integration.

For lateral expansion, in July 2010 the Group acquired a 51% equity interest in Qinghai Chenguang New Energy Co., Ltd. (青海辰光新能源有限公司), of which upon acquisition the name has been changed to Solargiga Energy (Qinghai) Co., Ltd. (陽光能源(青海)有限公司), to jointly invest in constructing a factory with 192 monocrystalline solar ingot pullers. Upon the completion of construction, the annual production capacity of monocrystalline silicon ingots of the Group will increase to 1.2G as our target is to become the leading monocrystalline silicon solar ingots manufacturer in the world. In the meantime, the Group actively pursued increased the diversity of its products, and successfully expanded into the business of multicrystalline silicon solar ingots and wafers during the year under review. The Group established a joint venture with Liaoning Oxiranchem, Inc. (遼寧奧克化學股份有限公司) in September 2010 to jointly invest in a 500M multicrystalline silicon solar ingots and wafers project with the planned installation of 65 multicrystalline casting furnaces, 75 wiresaws and other auxiliary facilities. The above-mentioned development projects will not only benefit the Group to further expand its production capacity of monocrystalline products, but also help us to successfully expand its business to the multicrystalline field, speeding up its lateral expansion plan, and thus satisfy the strong demand of customers.

Furthermore, in order to gradually implement its vertical integration business model, the Group has also expanded its business to the downstream of w5(notmCemand lemeo1t2ws(T

to 39.5% for the year under review. Among them, the Group's major overseas markets are the US and Japan, which accounted for 24.7% and 11.4% of

2010 amounted to RMB118.825 million, representing an increase of 47.7% from RMB80.475 million for the corresponding period last year. The increase in administrative expenses was mainly due to the increase in research and development cost from RMB17.654 million in 2009 to RMB48.328 million in 2010 so as to cope with the expansion of production of the Company.

Finance costs

The Group's finance costs increased from RMB15.942 million for the year ended 31 December 2009 to RMB18.006 million for the year ended 31 December 2010. Finance costs represented mainly interest on bank loans and the municipal government loan. The increase in finance costs was due to the additional bank borrowings during the year to meet working capital requirements.

Income tax

Income tax expenses were RMB71.444 million for the year ended 31 December 2010, while a net tax credit amounting to RMB16.624 million was recorded for the corresponding period in 2009 due to the recognition of deferred tax assets in 2009.

Profit attributable to the equity shareholders

For the year ended 31 December 2010, the Group witnessed a turnaround as compared with the corresponding period in 2009 and recorded profit attributable to the equity shareholders of RMB214.121 million, accounting for 11.5% of our total turnover. A loss attributable to the equity shareholders of RMB98.098 million was recorded in 2009.

Inventory turnover days

The inventories of the Group comprised mainly raw materials namely polysilicon, crucibles and other auxiliary raw materials and finished goods. Owing to the expansion in production capacity as well as the good relationship with its suppliers, the Group was able to increase its inventory of raw materials when the market was in short supply. The inventory turnover days for 2010 were 104 days (2009: 230 days), representing a decrease of 126 days compared to the corresponding period last year. The Group's optimal inventory levels should be sufficient for three months' consumption in the case of polysilicon and one month's consumption for other auxiliary raw materials.

Trade receivable turnover days

In 2010, the trade receivable turnover days of the Group decreased to 33 days (2009: 77 days). Such turnover days were at a low level and were within the credit period that the Group grants to its customers. The Group normally grants a credit period of 30 to 90 days to its customers.

Trade payable turnover days

As global supply of polysilicon raw materials is limited and the volume of polysilicon used by the Group increased, the Group's prepayments to suppliers for purchasing raw materials increased. Therefore, the trade payable turnover days decreased to 32 days (2009: 61 days).

Liquidity and financial resources

The Group's principal sources of working capital during the year under review were cash flows from operating activities and bank borrowings. As at 31 December 2010, the Group's current ratio (current assets divided by current liabilities) was 1.38 (31 December 2009: 2.27). The Group had net borrowings of RMB202.259 million as at 31 December 2010 (31 December 2009: RMB82.255 million) with cash in bank and on hand of RMB459.734 million (31 December 2009: RMB236.191 million), pledged deposits of RMB74.113 million (31 December 2009: RMB44.055 million), short-term bank loans of RMB648.011 million (31 December 2009: RMB289.274 million), long-term bank loan of RMB85.000 million (31 December 2009: RMB70.000 million) and long-term municipal government loan of RMB3.095 million (31 December 2009: RMB3.227 million). Net debt to equity ratio (net debt divided by total equity) was 12.3% (31 December 2009: 5.9%). Such ratios show that the Group's financial position remains healthy.

Contingent liabilities

At 31 December 2010, the Group had no material contingent liabilities.

Foreign currency risk

The Group is exposed to foreign currency risk primarily through sales and purchases and cash and bank deposits that are denominated in a currency other than RMB, the functional currency of the operations to which they relate. The currencies giving rise to this risk to the Group are primarily the US Dollar, Euro and Hong Kong Dollar. The Directors do not expect any significant impact from movements in exchange rates since the Group uses foreign currencies received from customers to settle the amounts due to suppliers. In addition, the Directors ensure that the net exposure is kept to an acceptable level by buying or selling the US Dollar and Euro at spot rates where necessary to address short-term imbalances.

Human resources

At 31 December 2010, the Group had 2,081 (31 December 2009: 1,182) employees. The increase in employees was mainly for preparing the expansion of production.

AUDIT COMMITTEE

The Company's Audit Committee has reviewed the accounting principles and practices adopted by the Group and the Group's annual results for the year ended 31 December 2010.

FINAL DIVIDEND

No interim dividend was paid in 2010 (2009: RMB Nil). The board of Directors has recommended the payment of final dividend of RMB3.5 cents (HK4.1 cents) per share for 2010 (2009: RMB Nil per share).
